

COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

THE APPLICATION OF THE HARRISON)	
COUNTY WATER ASSOCIATION, INC.,)	
P. O. BOX 215, CYNTHIANA,)	CASE NO. 9253
KENTUCKY 41031, FOR A CERTIFICATE)	
OF CONVENIENCE AND NECESSITY)	

O R D E R

On October 9, 1984, the Commission entered an Order granting the Harrison County Water Association ("Harrison") a certificate of public convenience and necessity for a waterworks improvement project. The Order also approved the financing for the project. The Commission also entered an Order granting Harrison a certificate of convenience and necessity for supplemental construction on April 16, 1985.

On January 3, 1985, Harrison filed construction plans for the extension of lines to serve an additional 4 customers on Jones Lane and requested approval of this project as part of Case No. 9051, the Application of Harrison County Water Association, Inc., P. O. Box 215, Cynthiana, Kentucky 41031, for a Certificate of Convenience and Necessity.

The Commission entered an Order on January 17, 1985, to establish the current case for consideration of this matter and incorporated Case No. 9051 herein by reference.

Supplemental information concerning this additional construction was filed on February 6, 1985, March 4, 1985, and May 8, 1985, by Parrott, Ely and Hurt Engineers ("Engineer") of Lexington, Kentucky.

CONTINUITY OF ADEQUATE AND RELIABLE SERVICE

Harrison's Engineer has provided information which appears to indicate that reliable and adequate service can be maintained on the Jones Lane water line after completion of the proposed construction. The Commission is concerned, however, that Harrison's service to its customers on Jones Lane may not be totally adequate in the long term, due to the constraints of its existing water distribution system.

The Commission reminds Harrison of its obligation to provide adequate and reliable service to all of its customers. Harrison should monitor the adequacy of the expanded water distribution system after construction. If this monitoring indicates that the level of service is inadequate or declining, Harrison must take necessary actions to maintain the level of service in conformance with the regulations of the Commission.

FINDINGS AND ORDERS

The Commission, after consideration of the application and evidence of record and being advised, is of the opinion and finds that:

1. Public convenience and necessity require that the construction proposed in the application and record be

performed and that a certificate of public convenience and necessity be granted.

2. The financing for the supplemental work was approved by the Commission's Order in Case No. 9051 entered October 9, 1984.

3. The Commission's Orders in Case No. 9051 entered October 9, 1984, and April 16, 1985, should be affirmed in all other respects.

IT IS THEREFORE ORDERED that Harrison be and it hereby is granted a certificate of public convenience and necessity to proceed with the construction as set forth in the supplemental information herein approved.

IT IS FURTHER ORDERED that the Commission's Orders in Case No. 9051 entered October 9, 1984, and April 16, 1985, be and they hereby are affirmed in all other respects.

Done at Frankfort, Kentucky, this 17th day of May, 1985.
